

Flood 2011 Bulletin

National Rural Support Programme

Update – As of 13th November, 2011

Introduction – Cause of the Disaster

While the memories of devastating 2010 floods are still fresh, another deluge has hit the province of Sindh. Year 2011 monsoon rains started from 10th August caused havoc and created a flood like situation in southern districts of Sindh and the rains are continued increasing the miseries of people in the affected areas. District Badin, Mirpurkhas, Tando Allahyar, Tando Mohammad Khan, Tharparkar, Shaheed Benazirabad, Thatta and Umerkot are among the worst hit areas and millions of people are stranded in flooded villages. Due to the heavy and uninterrupted rains number of canals and surface drains have over topped due to excess water discharges. Various breaches in canals and drains connected with Left Bank Outfall Drain (LBOD) have left thousands of villages inundated. A large number of people, including women and children, have been displaced who have taken shelter on road side, canal embankments and other nearby government buildings.

Some people have lost their lives, thousands have become homeless, cattle died, and standing crops have perished. Communication system in the affected areas has also been severely disturbed resulting in further miseries. Some of the mobile networks are not working or reception is very poor, similarly internet services are also often not available

Proactive Role of NRSP – Rapid Assessment of the Disaster

NRSP operates in almost all flood affected area of the District Badin, Mirpurkhas, Thatta, Shaheed Benazirabad, Tando Allahyar and Tando Mohammad Khan. NRSP has been able to conduct a rapid assessment of flood damages. To complete this assessment, the organisation has capitalised its network of Local Support Organizations, Community Organisations and activists to facilitate information collection providing a full and up to date overview of the scale of the disaster, and the location of those affected. In the 173 UCs of 5 districts 678,456 households were surveyed. The findings are based on the field observations and meetings with the affected communities attributing percentage to the affected population against total population of the surveyed UCs.

Following is demographic information of the 5 districts.

Table-1

| S.No | District | Tehsils | Union councils | Estimated Households | Estimated Population |

A more comprehensive assessment of WASH needs in District Badin done by NRSP jointly with another local partner Sukaar Foundation has resulted as follows;

Total 41 locations were visited by assessment team. These locations are included 16 formal camps, 14 villages and 11 informal camps.

It was found that people in the relief camps confront serious health and civic issues. Supply of cooked food remains irregular and insufficient. Women and Children face great risks of water borne diseases in absence of clean drinking water and necessary health cover.

Overall Recommendations

The general immediate recommendations for intervening WASH activities are;

- Installation of temporary toilets
- Distribution of soaps for hand washing
- Distribution of hygiene kits including sanitary-pads/mosquito-nets
- Distribution of water purifying tablets/sachets
- Repair of existing water sources
- Distribution of water storage /collection vessels
- Distribution of IEC material and imparting hygiene awareness /education
- Disease surveillance (especially water borne/related)

Outreach of NRSP Sindh – As of June, 2011

NRSP's mandate is to alleviate poverty by harnessing people's potential and undertake development activities in Pakistan. NRSP works for the people through the Community Organizations (COs) which are essentially the “organizations of people”. COs are the foundation of institutional structure of communities, the Village Organizations (VOs) and Local Support Organizations (LSOs) are the federations of COs at union council levels.
